STORE RE-INSPECTION GUIDANCE

Amended 6.14.22

Options for re-inspection:

1. Full re-inspection: Inspection includes all components of a typical retailer inspection. Inspect for the original violation and for compliance with all other sales policies;
2. Re-inspection for policy (policies) violated: If at previous inspections the retailer satisfied all other sales policies, the inspector can limit the re-check to the original violation(s). However, it is good policy to always check for flavor sales and nicotine strength violations.
3. Case-by-case re-inspection: The inspector decides breadth of re-inspection. Inspector should use their discretion based on retailer history, number of products observed, complaints received by the board of health, etc.
